

Egan Marine Corporation

M/V Denise E

This vessel is a typical, single screw Great Lakes harbor tug of riveted steel construction having a model bow, molded hull and rounded stern. The main deck is open aft for handling of towlines. The vessel is equipped with a low profile pilothouse and three quarter height raised trunk over the machinery spaces. A crew's berthing area is located forward of the engine room, accessible via a watertight door in the forward bulkhead of the engine room/lower machinery space area and additionally accessible via a stairway which leads to the galley located immediately above the aforementioned berthing area.
