## M/V Robin E

This vessel is a typical, single screw Great Lakes harbor tug of riveted steel construction having a model bow, molded hull and rounded stern. The main deck is open aft for handling of towlines. The vessel is equipped with a low profile pilothouse and three quarter height raised trunk over the machinery spaces. A crew's berthing area is located forward of the engine room, accessible via a watertight door in the forward bulkhead of the engine room, accessible via two (2) watertight doors, one (1) each port and starboard.
